

Jerusalem Artichoke Beauty Series

The "Jerusalem Artichoke Beauty Series" uses Jerusalem Artichoke, which is rich in the dietary fiber "inulin" and was grown in Hokkaido, where there are large temperature differences. Jerusalem Artichoke is a popular vegetable that has been featured on TV and in magazines. Fresh Jerusalem Artichoke has a short shelf life and is hard to come by, but we have devised ways to make it possible to store it for long periods of time by processing it into freeze-drying, dried powder, jelly, etc. The dietary fiber "inulin" has various effects, and Jerusalem Artichoke, which contains a lot of "inulin," is called a "superfood."

Popular product made with pesticide-free Jerusalem artichoke from Hokkaido

20 g

Freeze dry

Jerusalem artichoke freeze-dried Platinum Blessing

These freeze-dried chips are made from Jerusalem artichoke without any fried ingredients or additives. Made simply from Jerusalem artichoke, they are a low-calorie, highly nutritious product. The freeze-drying process removes the moisture from the Jerusalem artichoke, allowing them to be stored for long periods of time. As the moisture content has been reduced, 20g of freeze-dried chips is equivalent to 130g of raw Jerusalem artichoke. 20g of the product also contains the equivalent of 10g of inulin.

Nutritional content: per 20g bag: Energy: 34kcal, Protein: 1.6g, Fat: 0.2g, Carbohydrates: 15.1g, Salt equivalent: 0.0g

30 packets

Jelly

Jerusalem Artichoke Beauty Jelly Premium

This jelly contains dried Jerusalem artichoke powder. It can be easily consumed without water. It contains resveratrol, a high-grade beauty ingredient with strong antioxidant properties! One packet contains the same amount of polyphenols as 5 to 10 wine glasses.

Ingredients: Jerusalem artichoke powder (from Hokkaido), high fructose glucose liquid sugar, concentrated peach juice, agar (kariconcan), grape skin extract (trans-resveratrol) / flavoring, citric acid, thickening polysaccharides, sodium citrate, sweetener (sucralose), acidulant, coloring (lac)

Nutritional content: per 20g packet
Energy: 10.0kcal, protein: 0.2g, fat: 0.0g, carbohydrates: 3.4g, salt equivalent: 0.0g (2g/packet Jerusalem artichoke powder included *2g powder = 11g Jerusalem artichoke equivalent)

50 g

Powder

Jerusalem Artichoke Beauty High Concentration Powder

We have made Jerusalem artichoke into a "concentrated powder." It is dried and sterilized, so it can be stored for a long time. The powder is 5 to 6 times more concentrated than raw Jerusalem artichoke, so 50g of the powder is equivalent to 250 to 300g of raw Jerusalem artichoke. This product can be used in a variety of ways, such as adding it to cooking.

Nutritional content: per 50g bag: Energy: 90kcal, Protein: 4.0g, Fat: 0.6g, Carbohydrates: 39.8g, Salt equivalent: 0.0g
